

Alkalami - Announcement

Changes

2022-06-xx (WSTech team) Alkalami Version 2.000 (production release) - Removed Alkalami Light font. - Removed non Unicode compliant solutions - Updated behavior for initial forms of sad, dad and meem followed by hah-like characters to be "flat" instead of stacked

Both desktop and web fonts are provided in a single, all-platforms package on the [Download Page](#).

Known issues

If you used previous versions of this font, we made some decisions which were unfortunately not Unicode compliant. Since the initial release of this font, many of these non Unicode compliant characters have been added to Unicode. You will need to re-encode some characters to be fully Unicode compliant. A chart which includes the list of characters is found at the bottom of the [Font Features](#) page.

This guide is from the [Alkalami project](#) version 1.300 and is copyright © 2015-2022 SIL International.
